How to handle embroidery thread

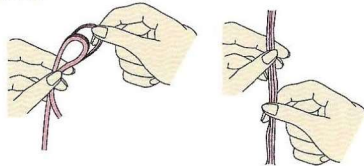

Cut the thread to a length that is easy to use. It will be easier to use 0.5m for detailed designs and 1m for continuous designs.

One #25 floss is made by loosely twisting 6 thin threads.

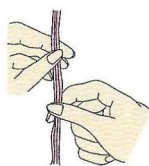

To make the thread bulge, pull it out one by one to loosen the thread, and use it after arranging the required number of threads for a beautiful stitch.

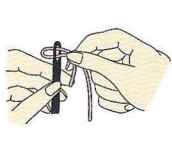

The #25 floss is made by loosely twisting 6 thin threads. Pull out some of these thin threads and call it 「○ strands」.

① Fold the thread in half and pull out the required number of threads one by one from the pile.

② Align the threads.

③ Pass the end of the thread in a loop through the needle hole.

● How to use thread

〈How to make a knot〉

If you are not accustomed to handling threads and needles, it will be easier to stitch if you make a knot.

As shown in the figure on the right, wind the thread 2 to 3 times on the needle and pull out the needle.

※ It is recommended to get used to the method of entwining the thread below.

〈How to thread the last eye of a stitch.〉

Leave 5 - 7 cm of thread at the beginning of the stitch, Thread the thread behind the stitch.

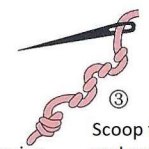

Tie knot at the end as shown in the figure, or thread some stitches through the back thread.

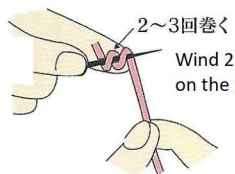

① Thread the needle through the eye of the last stitch.

② Put a needle in the ring and make a knot.

③ Scoop the stitches and cut the thread.
