# Please read this manual carefully before you start!

## Precaurions

*Please be careful when handling the needle.
*Please make sure you have all the kits listed before you start.
*If you run out of thread, such as stitch mistake, please contact us.

## Kit contents

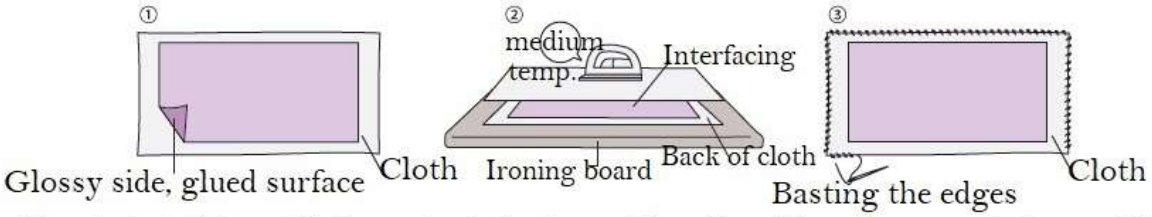
*#25 floss *Needles
*Embroidery cloth (size about 30cm x 60cm)
Design pre-printed
*Interfacing

## Things to prepare

*Sewing needle & Thread
*Scissors
*Tape for finishing
*Iron

[Quality] Floss (Cotton 100%), Needle(Steel), Cloth(Linen),Interfacing(Polyester)

## Prepare before starting embroidery and How to use Interfacing.



1: Align the interfacing with the center of the back of the cloth and stack it.

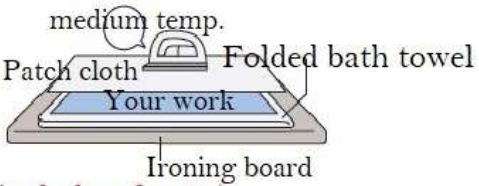
2: Apply a patch and iron it together. Hold the iron for 3 to 5 seconds. The interfacing will settle when it cools. Do not flip the cloth before it gets cool.

3: It is a good idea to start by threading around the esgeds of the cloth.

## Finish the work

### How to finish

1: Fold a bath towel on top of the ironing board to protect the stitches from collapsing.
2:Cover with a patch cloth and lightly iron at medium temp.
(Dry flat in a well-ventilated shade.)



### How to set inf frame (Note: This kit does not include a frame.)

1: When using the Olympus W-47 frame, use the thick paper that is included.
2: Place the thick paper of the frame on the back side, aligning the embroidery part in the center.
3: Stretch the cloth with thread(figure A) or tape(figure B) so that it does not slack.
4: Put it in the frame and you are done!
